Contents of volume 60, 1998

Part 1

Report of the Editors — 1997 *M. C. Jones and G. A. Young* 1
Robust models in probability sampling *D. Firth and K. E. Bennett* 3
Weighting for unequal selection probabilities in multilevel models
D. Pfeffermann, C. J. Skinner, D. J. Holmes, H. Goldstein and J. Rasbash 23
Discussion on the papers by Firth and Bennett and Pfeffermann et al. 41
Model-based inference for categorical survey data subject to non-ignorable non-response
J. J. Forster and P. W. F. Smith 57
Analysis of longitudinal binary data from multiphase sampling
D. Clayton, D. Spiegelhalter, G. Dunn and A. Pickles 71
Discussion on the papers by Forster and Smith and Clayton et al. 89
Second-derivative functional regression with applications to near infra-red spectroscopy
C. Goutis 103
Improving survey-weighted least squares regression *L. Magee* 115
A semiparametric method of multiple imputation
S. R. Lipsitz, L. P. Zhao and G. Molenberghs 127
On an adaptive transformation–retransformation estimate of multivariate location
B. Chakraborty and P. Chaudhuri 145
Mixed effects smoothing spline analysis of variance *Y. Wang* 159
Extending the family of Bayesian bootstraps and exchangeable urn schemes
P. Muliere and S. Walker 175
On an alternative solution to the vector spline problem *T. W. Yee* 183
Polynomial regression with errors in the variables *C.-L. Cheng and H. Schneeweiss* 189
Residuals for the linear model with general covariance structure *J. Haslett and K. Hayes* 201
An optimization interpretation of integration and back-fitting estimators for separable non-parametric models *J. P. Nielsen and O. B. Linton* 217
Nonparametric validation of similar distributions and assessment of goodness of fit
A. Munk and C. Czado 223
Semiparametric likelihood-based inference for biased and truncated data when the total sample size is known *G. Li and J. Qin* 243
Optimal scaling of discrete approximations to Langevin diffusions
G. O. Roberts and J. S. Rosenthal 255
Simpson's paradox and the Bayes factor *M. Aitkin* 269

Part 2

Smoothing parameter selection in nonparametric regression using an improved Akaike information criterion *C. M. Hurvich, J. S. Simonoff and C.-L. Tsai* 271
Detecting possibly non-consecutive outliers in industrial time series *A. Luceño* 295
Additive nonparametric regression with autocorrelated errors
M. Smith, C.-M. Wong and R. Kohn 311
Automatic Bayesian curve fitting *D. G. T. Denison, B. K. Mallick and A. F. M. Smith* 333
Curve registration *J. O. Ramsay and X. Li* 351
Estimating smooth monotone functions *J. O. Ramsay* 365
Bayesian *versus* frequentist measures of error in small area estimation
A. C. Singh, D. M. Stukel and D. Pfeffermann 377
Limited information likelihood analysis of survey data
R. L. Chambers, A. H. Dorfman and S. Wang 397

Bias-calibrated estimation from sample surveys containing outliers
A. H. Welsh and E. Ronchetti 413
Testing for pairwise serial independence via the empirical distribution function *Y. Hong* 429
Triple-goal estimates in two-stage hierarchical models *W. Shen and T. A. Louis* 455
Ordered multivariate extremes *S. Nadarajah, C. W. Anderson and J. A. Tawn* 473

Part 3

Some algebra and geometry for hierarchical models, applied to diagnostics (with discussion)
J. S. Hodges 497
Bivariate quantile smoothing splines *X. He, P. Ng and S. Portnoy* 537
A note on the unification of the Akaike information criterion *P. Shi and C.-L. Tsai* 551
Fast EM-type implementations for mixed effects models *X.-L. Meng and D. van Dyk* 559
Calibrating the excess mass and dip tests of modality *M.-Y. Cheng and P. Hall* 579
Local maximum likelihood estimation and inference *J. Fan, M. Farmen and I. Gijbels* 591
Boundary detection through dynamic polygons *A. Pievatolo and P. J. Green* 609
Multivariate Bayesian variable selection and prediction
P. J. Brown, M. Vannucci and T. Fearn 627
Bayesian image analysis with Markov chain Monte Carlo and coloured continuum triangulation models *G. K. Nicholls* 643
Corrigendum: On Bayesian analysis of mixtures with an unknown number of components
S. Richardson and P. J. Green 661

Part 4

Estimation in multitype epidemics *T. Britton* 663
Nonparametric estimation of the mode of a distribution of random curves
Th. Gasser, P. Hall and B. Presnell 681
Testing heteroscedasticity in nonparametric regression *H. Dette and A. Munk* 693
A class of local likelihood methods and near-parametric asymptotics
S. Eguchi and J. Copas 709
Wavelet thresholding via a Bayesian approach
F. Abramovich, T. Sapatinas and B. W. Silverman 725
Estimating the variance in nonparametric regression—what is a reasonable choice?
H. Dette, A. Munk and T. Wagner 751
On efficient point prediction systems *K. Skouras and A. P. Dawid* 765
On the statistical inference of a machine-generated autoregressive AR(1) model
J.-P. Stockis and H. Tong 781
Bias-corrected confidence bands in nonparametric regression *Y. Xia* 797
Acknowledgement of priority: Unbiased estimation of central moments by using U-statistics
P. M. Heffernan 813
Index of authors 814
